

## MOISES MATA MARTINEZ

SOFTWARE ENGINEER LEAD - BACK-END DEVELOPMENT SPECIALIST

+52 814-5032-349 - moises.mata.m@outlook.com - [www.linkedin.com/in/moises-mata-m](https://www.linkedin.com/in/moises-mata-m) - Monterrey, Nuevo León

### PROFESSIONAL PROFILE

Systems Engineer with **over 10 years of experience** in developing **applications, services, and microservices using .NET Framework, .NET Core, and SQL Server**. Specialized in building scalable, high-performance solutions across industries such as **finance, retail, and environmental security**. Expert in **software architecture** design and implementation, process optimization, and solving complex technological challenges. Strong focus on **SOLID principles, Clean Code, and Clean Architecture** to ensure quality, maintainability, and scalability. Proven leadership in strategic projects, team management, and **Agile methodologies (Scrum)** for the efficient delivery of innovative solutions. Passionate about continuous improvement, performance optimization, and transforming challenges into opportunities for innovation.

Professional Philosophy: **"Every system can be optimized."**

### WORK EXPERIENCE

#### SOFTWARE ENGINEER LEAD

Dimex Capital - Monterrey, Nuevo León

april 2019 – july 2024

- Developed clean, scalable, and maintainable code using **.NET (C#, .NET Core, .NET Framework)**, applying **Clean Code and Clean Architecture** principles.
- Implemented cloud-based solutions with Azure, utilizing:
  - **Azure App Services** for web application deployment and management.
  - **Azure Functions** for maintaining serverless processes.
  - **Azure Blob Storage** for file storage and management.
  - **Azure DevOps** for CI/CD management, version control, and automated deployments.
  - **Azure SQL Database** for cloud-based data management.
- Designed and optimized **SQL Server databases**, including **Stored Procedures, Triggers, and Indexing** to enhance efficiency.
- Developed and optimized **RESTful APIs/Web APIs**, ensuring seamless third-party integration and compliance with security standards.
- Led the implementation of microservices architectures, ensuring scalability and modularity.
- Advanced experience in **.NET Core**, leveraging **multi-threading, debugging, and performance optimization**.
- Managed version control using **Git and Team Foundation Server (TFS)**, ensuring code traceability.
- Implemented design patterns (**Strategy, Singleton**) to build robust and maintainable solutions.
- Applied **SOLID** principles and Object-Oriented Programming (**OOP**) to enhance modularity and maintainability.
- Followed Agile methodologies (**Scrum**) to ensure iterative delivery and development efficiency.
- Proactively resolved technical issues, ensuring stability and availability of critical systems.
- Created technical documentation and executed unit and integration testing to guarantee software quality.
- Focused on continuous improvement through research and optimization of technological processes.

#### IT SR Developer

Exertus - San Pedro Garza García, Nuevo León

september 2018 – march 2019

- Backend development with **C# and .NET Framework**, contributing to robust and scalable applications.
- Frontend development with **ASPX, Bootstrap, and Angular**, ensuring intuitive and responsive interfaces.
- Designed and developed **SQL Server databases**, optimizing performance through **Stored Procedures and Triggers**.
- Implemented layered architecture (**N-tier, MVC, MVVM**) to enhance code modularity and maintainability.
- Developed enterprise solutions with **PowerApps**, integrating automated processes to improve operational efficiency.

## IT SR Developer

Intelexion - Monterrey, Nuevo León

march 2018 – september 2018

- Backend development with **C# and .NET Framework**, contributing to robust and scalable solutions.
- Designed and developed **SQL Server databases**, optimizing performance with **Stored Procedures and Triggers**.
- Frontend development with **ASP.NET, Ajax, HTML, and jQuery**, creating dynamic and responsive interfaces.
- Implemented **microservices architectures**, ensuring modularity and scalability.
- Integrated systems with **RabbitMQ**, optimizing communication in distributed applications.
- Applied the **MVC design pattern**, ensuring best practices in software development.
- Managed version control with **Git**, ensuring efficient collaboration in development teams.

## IT SR Developer

Cloudcom - Monterrey, Nuevo León

october 2016 – february 2018

- Backend development with **C# and VB in .NET Framework**, contributing to robust and scalable solutions.
- Designed and developed **SQL Server databases**, optimizing performance with **Stored Procedures and Triggers**.
- Version control with **TortoiseSVN**, ensuring integrity and collaboration in software development.
- Developed **desktop applications** with **WinForms**, designing intuitive and functional interfaces.
- Implemented **Windows Services** for scheduled tasks and **background services**.

## IT SR Developer

Grupo Blanquita - Reynosa, Tamaulipas

february 2015 – september 2016

- Backend development with **C# and VB in .NET Framework**, creating scalable and high-performance solutions.
- Frontend development with **ASPX, Ajax, jQuery, and XML**, designing dynamic and functional interfaces.
- Designed and optimized **SQL Server databases**, including **Stored Procedures, Triggers, and Views**.
- Created desktop applications with **WinForms**, improving usability and operational efficiency.
- Implemented **Windows Services** for task automation in the background.
- Gathered requirements, ensuring alignment with client needs.
- Applied Quality Assurance (**QA**) testing to ensure system stability and proper functionality.
- Installed and configured applications in production environments.
- Provided on-site and field **technical support**, offering effective assistance and troubleshooting.

## SKILLS AND KNOWLEDGE

---

### Software Development and Architecture

- **Languages y Frameworks:** C#, .NET Core, .NET Framework, Entity Framework, LINQ.
- **Principles and Best Practices:** SOLID, Clean Code, Clean Architecture.
- **Web Development and API:** RESTful APIs, REST API, Swagger, MVC.
- **Microservices:** Design, build, and deploy scalable and decoupled architectures. Understanding of microservices architecture, including design, development, and deployment.
- **Performance Optimization:** Performance Optimization: Ability to optimize services for performance and understand how to design scalable systems.

### Databases

- **SQL Server:** Database design and optimization, Stored Procedures, Triggers and Indexes.

### Cloud & DevOps

- **Azure:** Azure App Services, Azure Blob Storage, Azure SQL DataBase.
- **CI/CD:** Deployment automation and pipelines.
- **DevOps:** Continuous integration and delivery with efficient practices.

## Version Control and Tools

- **Code Management:** Git, Team Foundation Server (TFS).
- **Testing and APIs:** Postman for API integration testing.

## Methodologies and Project Management

- **Agile (Scrum):** Iterative development and collaborative teamwork in high-performance.

## EDUCATION

---

### Computer Systems Engineering

Universidad Tamaulipeca - Reynosa, Tamaulipas  
mayo 2023 – agosto 2025

### Technical Programmer in Systems

Universidad Tamaulipeca - Reynosa, Tamaulipas  
2011 - 2013

## CERTIFICATIONS

---

- [AZ-400T00A: Designing and Implementing Microsoft DevOps solutions](#)
- [AZ-204T00A: Developing Solutions for Microsoft Azure](#)
- [Programming Challenge: Python](#)
- [Secure Development](#)
- [Developing Leaders](#)
- [AZ-900: Microsoft Azure Fundamentals](#)
- [Professional Scrum Master](#)

## LANGUAGE

---

- Spanish Native
- English: Technical proficiency in reading and writing (intermediate level)

## RELEVANT PROJECTS

---

### API for Executing Stored Procedures

- Development of a generic API that allows the execution of any type of stored procedure with parameters and returns formatted responses.
- Flexible connection to different types of database servers.
- **Technologies:** C#, .NET Core, SQL Server, Entity Framework.

### API for Compiling and Executing Code at Runtime

- Implementation of an API that allows dynamic compilation and execution of code at runtime.
- **Technologies:** C#, .NET Core, Reflection.

### API for URL Masking

- Creation of an API that masks URLs to enhance security and usability in web applications.
- **Technologies:** C#, .NET Core, RESTful APIs.

### NuGet Library for PDF File Manipulation

- Development of a NuGet package that enables working with PDF files, including image-to-PDF conversion, splitting, merging, and image extraction.
- **Technologies:** C#, .NET Core, bibliotecas de manipulación de PDF.

### NuGet ORM Library for SQL Connection Management

- Creation of a custom ORM to efficiently handle and manage SQL connections and executions.
- **Technologies:** C#, .NET Core, SQL Server.

### NuGet Library for Azure Blob Storage Connections

- Development of a NuGet package that simplifies the management of connections and operations with Azure Blob Storage.
- **Technologies:** C#, .NET Core, Azure Blob Storage.

### NuGet ORM Library for PostgreSQL

- Implementation of a specific ORM for PostgreSQL, allowing the management of connections and query executions.  
**Technologies:** C#, .NET Core, PostgreSQL.
